Driver installation guide

We provide driver installation programs for the following computer systems
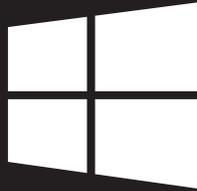

Driver for Windows   Driver for macOS

Before installing the driver, please make sure that you have finished the following steps.

1. Your printer has been connected to your computer with USB cable.
2. Your printer has been connected to the power socket and turned on.
3. You know the operation system of your computer.
4. Download the printer driver from the USB included or from our official website. Contact customer support if you need assistance.
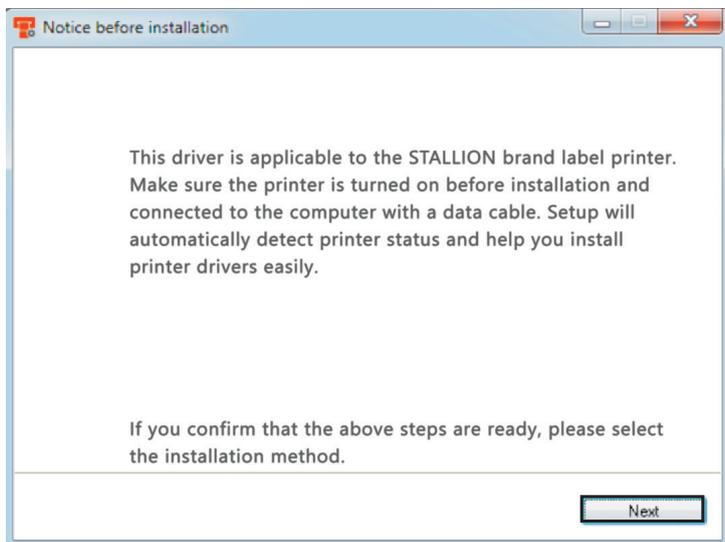

Now, we will show you how to install the driver step by step in Windows PC and Mac.
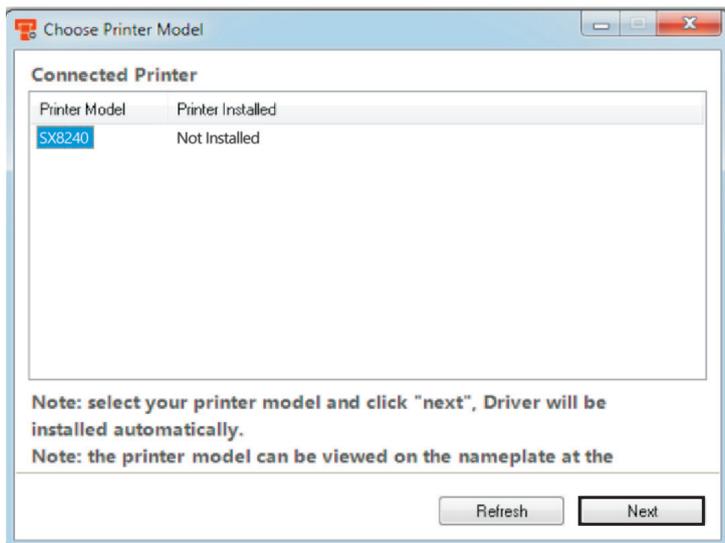

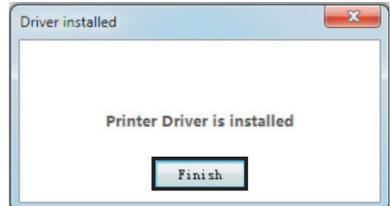

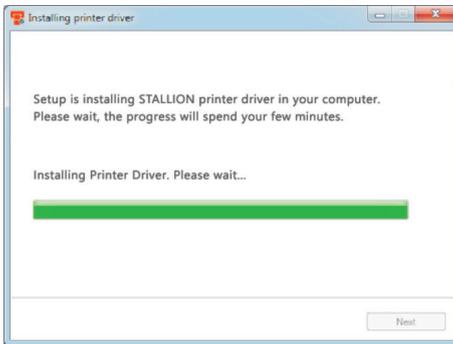

Driver for Windows

Driver for Windows

1. Click "Next"

Notice before installation

This driver is applicable to the STALLION brand label printer. Make sure the printer is turned on before installation and connected to the computer with a data cable. Setup will automatically detect printer status and help you install printer drivers easily.

If you confirm that the above steps are ready, please select the installation method.

2. Click "Next"

Choose Printer Model

Connected Printer

Printer Model	Printer Installed
SX8240	Not Installed

Note: select your printer model and click "next", Driver will be installed automatically.
Note: the printer model can be viewed on the nameplate at the

Refresh   Next

3. Click "Finish"

## 4. Click [Control Panel] \ [Hardware and Sound] \ [Devices and Printers]
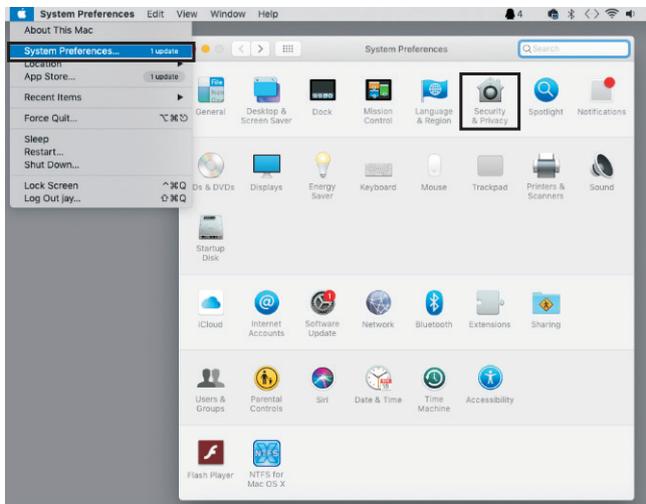

Driver for macOS

⚠ Important tips:

As a default, macOS only permits softwares downloaded from App Store, so when it runs a software downloaded from elsewhere, it will pop out a warning page like below to stop the installation process.

Therefore, if you choose to download the driver from our official website, you will need to conduct some extra steps to ensure a successful driver installation in your macbook.
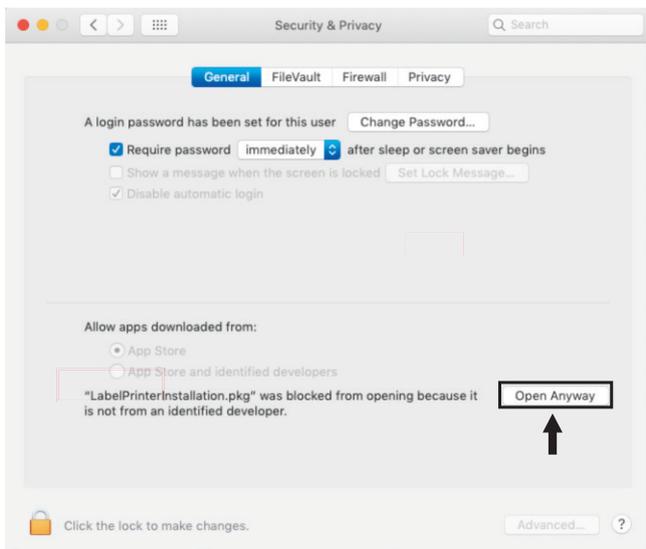

"LabelPrinterInstallation.pkg" can't be opened because it is from an unidentified developer.

Your security preferences allow installation of only apps from the App Store.

"LabelPrinterInstallation.pkg" is on the disk image "SX8240.dmg". Safari downloaded this disk image today at 4:34 PM.

?
OK

Follow the below steps to finish the driver installation successfully.

**1. Click【System Preferences】and click【Security & Privacy】.**

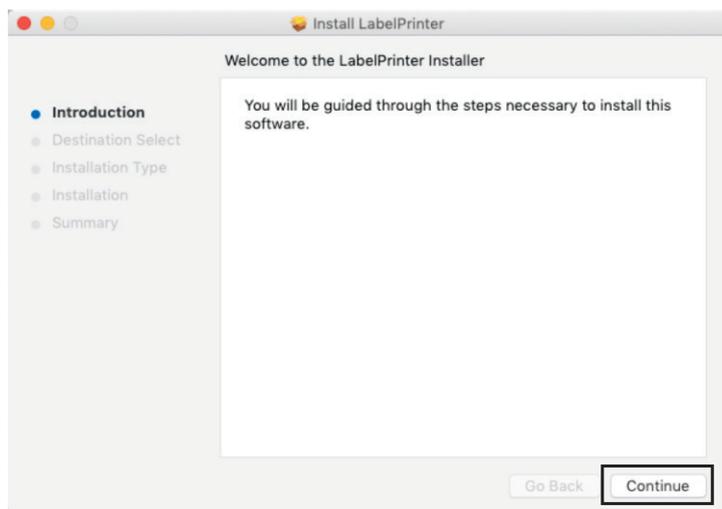

2. In【Security & Privacy】, click【Open Anyway】.

Driver for macOS
